

**3M**

**G-5**

**Wireless  
System**

A new standard,  
**inspired** by you

### **We began with a clean slate!**

We didn't just try to improve our headset, we set out to improve the whole way you operate. We began with in-depth interviews of quick-service restaurant (QSR) employees. Our aim was to gain a deep understanding of today's most pressing operations and communications challenges. Armed with these insights as well as decades' worth of experience in the QSR industry, we started over and explored every way possible to improve your business and make your job easier. In the end, one thing is clear—we accomplished our mission.

# 3M G-5 Wireless System

## 3M authentication ensures quality from day one

Only using a genuine 3M control pod, carrier and battery together will power the headset. You invest in 3M quality, reliability and safety, we're here to make sure you get it.

## Get charged up about a smarter battery

It's the first headset with Smart battery technology. With a battery charge gauge, end-of-battery-life indicator and 3M OEM battery authentication, you'll never be surprised by a dead battery again.

### SNAPSHOT:

- > No need to remove the battery to charge
- > Battery charge gauge and end-of-life battery indicator
- > 3M OEM battery authentication

## Dock it and you're done

Headsets charge in the integrated headset storage unit, which can be mounted on a wall or set on a tabletop. No need to remove the battery, just pop it on the dock and you're good to go.

### SNAPSHOT:

- > Integrated storage and charging unit
- > Can be wall mounted or used on a tabletop
- > Charges up to five extra batteries

## Service in a snap

Now you can service and make several key repairs in store in seconds. You'll save time and money and have less downtime. Plus you won't be burdened by having to ship and track headsets sent out.
